UNDER THE SPOTLIGHT

Learn About Tomorrow's Advances Today

Breakthroughs in
All-Round Bleed Protection

Join us to learn about clinical and scientific advances in care for patients with haemophilia A. Results from the first interim analysis of the MOTIVATE study in ITI will be presented, alongside novel scientific data examining the role of FVIII in platelet binding, endothelial cell binding and joint and bone health.

AGENDA & SPEAKERS

Welcome and Introduction

Chair: **Guy Young, US**

First Results From the MOTIVATE Study

Carmen Escuriola Ettingshausen, DE

FVIII Binding to Platelets: Are There Differences Between the Products?

Viola Vogel, CH

Generating Long-Term Data on Bone and Joint Health: The PROVE Study

Yesim Dargaud, FR

Exploring the Functionality of Endothelial Cells in Haemophilia A

Antonia Follenzi, IT

Q&A
